## BITTER APRICOT KERNEL

Chinese wild natural bitter apricot kernel, ,Latin name *Semen armenicae amarum*. The fruit matures in summer and BAK is processed by Shelling, Cracking, screening, and color sorting, which production line designed and produced by ourself.

The main functions of BAK include relieving cough and asthma, moistening the intestines and promoting bowel movements. Used for coughing, wheezing, chest fullness, excessive phlegm, blood deficiency, fluid stagnation, intestinal dryness, and constipation. Apricot trees mainly growing in Inner Mongolia, Jilin, Liaoning, Hebei, Shanxi, and Shaanxi province of China

### Specifications:

- 25kg/bag, 50kg/bag
- Production capacity : 200 metric ton each day

### Applications:

Food, protein beverages and pharmaceutical industry

## Products (2)

### DE-BITTERED APRICOT KERNEL

Wild nature bitter apricot kernel is under blanched and de-bittered treatments become de-bittered apricot kernels with natural flavor

#### Specifications: :

- 24/carton 25kg/bag
- Natural organic
- No additives
- Amygdalin 4– 5 %
- Cyanide < 10 ppm
- Fat 40% more or less
- Protein : > 20 %

#### Applications:

Can be used as marzipan, protein beverages, pastry bakery, apricot kernels tofu apricot kernel tea etc

## Products (3)

### BITTER APRICOT KERNELS EXTRACT

Bitter apricot kernels extract contains bitter apricot kernels' ointment and amygdalin powder, amygdalin ointment is extracted from bitter apricot kernels, and amygdalin is purified by process to obtain 98% amygdalin powder, which can be widely used in medicines, health care products and other fields. Base on apricot kernel powerful Industry We take an absolute advantage of quantity and quality an amygdalin production

#### Specifications:

- Amygdalin powder content, HPLC 5%-99%

#### Applications:

In the fields of medicine, health products, anti-cancer drugs, preparations, injections, etc

## Products ( 4 )

### APRICOT KERNEL POWDER

Apricot kernels powder is a powder made from De-bittered apricot kernels, the color is pale yellowish-white, and its texture is light and silky to the touch

#### Specifications:

- 25kg/bag
- natural organic matter
- Whole fat 20%,
- Defatted 25%-33%, rich in amino acid ,vitamis, nutrients.

#### Applications:

It can be applied to beverages, Powder drinks and food additives etc

## Products (5)

### APRICOT KERNEL PROTEIN

Apricot kernel protein is a plant protein extracted from Chinese natural apricot kernels with high nutritional value and multiple functional properties. Apricot kernel protein contains amino acids, high-quality protein, vitamin E, healthy fats, and minerals such as calcium, phosphorus, iron, etc. Apricot kernel protein contains protein that is easy to digest and has a well-balanced amino acid profile, making it an extremely valuable vegetable protein

#### Specifications:

- 40%-80%
- can be customized

#### Applications:

Apricot kernel protein is Not only used for health foods and supplements, but also in personal care products and Powder drinks

## Products ( 6 )

### APRICOT KERNEL OIL

Apricot kernels oil, slightly yellow and transparent, with a fragrant taste, is not only an excellent edible oil, but also an important raw material for cosmetics and high-quality soap

#### Specifications:

- Customizable
- Contains unsaturated fatty acids
- Acid value
- Peroxide Value
- Packed in Jumbo bag / glass bottle

#### Applications:

Food Grade

Cosmetic Grade

# Products (7)

## PHOLIOTA NAMEKO EXTRACT

A nutritious natural ingredient extracted from Pholiota nameko mushroom. Mushroom powder extract contains polysaccharides, strong water solubility, in addition to the addition of small yellow mushroom powder, the extraction source is the fruiting body of Mushroom, the color is brownish-yellow, and the smell is fragrant. It can be used in the production of nutritional and health products.

### Specifications:

- UV 30%—50%
- Customizable
- The shelf life is 24 months
- Packed in 25kg cardboard drum or 1kg aluminum foil bag

### Applications:

Pholiota nameko extract is a nutrient with a wide range of applications. It has a variety of effects such as anti-tumor, immunomodulatory, hypoglycemic, hypolipidemic, and anti-fatigue.

# Products (8)

## SHIITAKE MUSHROOM EXTRACT

Shiitake extract is obtained from shiitake mushroom as raw material through advanced extraction technology, and lentinan is one of the important components in shiitake mushroom extract

### Specifications:

- UV 30%—50%
- Customizable
- The shelf life is 24 months.
- Packed in 25kg cardboard drum or 1kg aluminum foil bag

### Applications:

In the food field, it can be used as a food additive to enhance the nutritional value of food

In the medical field, it is widely used in the pharmaceutical field due to its various biological activities
